

2023 Blue Cross and Blue Shield Service Benefit Plan - FEP Blue Focus
Section 2. Changes for 2023

Section 2. Changes for 2023

Do not rely only on these change descriptions; this Section is not an official statement of benefits. For that, go to Section 5 (Benefits). Also, we edited and clarified language throughout the brochure; any language change not shown here is a clarification that does not change benefits.

Changes to our FEP Blue Focus

- We now cover preventive low-dose CT screenings for lung cancer for members aged 50 to 80. Previously, preventive benefits did not start until age 55.
- We now require prior approval for certain high-cost drugs obtained outside of a pharmacy setting. Previously, prior approval was not required. (See page [20](#).)
- We now require prior approval for proton beam therapy. Previously, prior approval was not required. (See page [20](#).)
- We now require prior approval for stereotactic radiosurgery and stereotactic body radiation therapy. Previously, prior approval was not required. (See page [20](#).)
- We now cover one year of sperm and egg storage for those individuals facing iatrogenic infertility. Previously, there was no benefit for this service. (See pages [21](#), [48](#) and [130](#).)
- We now cover computed tomography (CT) colonography under the adult preventive benefit for colorectal cancer tests. Previously, this was not covered under the preventive benefit. (See page [42](#).)
- We will make changes as soon as possible and provide you preventive benefits for the USPSTF A and B, ACIP, HRSA, and Bright Futures recommendations as they occur through the year. Previously, updates were made annually. (See pages [42](#) and [44](#).)
- We now provide 8 visits per calendar year to treat depression associated with pregnancy with no member cost-share when a Preferred provider is used. Previously, we provided coverage for only 4 visits per calendar year. (See page [45](#).)
- We now provide individuals who are pregnant with a free blood pressure monitor when ordered through our vendor. (See page [46](#).)

- We now provide benefits for medically necessary bariatric surgery beginning at the age of 16. Previously, this benefit was limited to individuals aged 18 and older. (See page [57](#).)
- We no longer limit the number of non-full sibling donor screening tests for transplants. Previously, we limited non-full sibling donor test screenings to three. (See page [67](#).)
- We now cover medical foods for the treatment of inborn errors of amino acid metabolism regardless of age. Previously, we limited this to individuals under the age of 22. (See page [94](#).)
- We now cover the generic naloxone nasal spray with zero cost-share for the first purchase of up to a 90-day supply per calendar year. Previously, we covered the Narcan nasal spray under this benefit. (See page [97](#).)
- We now provide coverage for weight loss medications to treat obesity when obtained through one of our pharmacy drug programs. Previously, these drugs were not covered for treatment of obesity.
- The calendar year deductible is now waived for all overseas services. (See page [107](#).)
- We now cover over-the-counter (OTC) condoms for all members with zero member cost-share when you have a prescription from your physician and they are purchased in a Preferred retail pharmacy. Previously, benefits were available only for female condoms. (See page [95](#).)
